**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6 and 12-15, drawn to device and method for color image processing according to Embodiment 1 (figures 1 and 4), classified in class 382, subclass 167.
  - II. Claim 7-11 and 16-19, drawn to device and method for color image processing according to Embodiment 2 (figures 5 and 6), classified in class 382, subclass 167.
2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are disclosed as separate and distinct embodiments that perform different functions and have different modes of operation. Invention I involves operations on luminance-chrominance image data whereas Invention II involves operations on lightness-saturation-hue image data.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
